

POH LOK YEE

DATA ENGINEERING STUDENT

(60)11-11510260 | lokyee1418@gmail.com | Seri Kembangan, Selangor | <https://www.linkedin.com/in/pohlokyee/>

SELF SUMMARY

Third-year Computer Science student majoring in **Data Engineering** with a practical approach to problem-solving. Experienced in hand-ons **SQL, Python, Java, and C++** through academic projects alongside team communication and coordination skills developed through promotional leadership and retail management roles. Highly adaptable, disciplined, and currently learning **UiPath** fundamentals to understand how process automation connects with data collection and system workflows.

EDUCATION AND CERTIFICATION

Bachelor of Computer Science (Data Engineering) | Universiti Teknologi Malaysia Oct 2023 – Present

- CGPA 3.98 /4.00 | Two Consecutive Years Dean's List Recipient
- Relevant Coursework: Database Programming, Application Development, Data Structures & Algorithms, Object-Oriented Programming (OOP), Software Engineering
- Certification: Alteryx Designer Core, AWS Cloud Foundations, Azure Data Fundamentals

EXPERIENCE

Automation Developer | Automated Invoice Processing System May 2026

- Built a step-by-step automation workflow to extract data from document files and handle approval routing using **UiPath Studio Web and Google Drive cloud connections**.
- Integrated a smart AI agent to review invoice records automatically alongside with easy-to-use approval app that lets humans review and sort files without manual work.

Data Engineer | Automated Cloud Data Pipeline Project Mar 2026

- Built an end-to-end cloud pipeline to extract local on-premises SQL sales data, transform it, and generate business insights using **Azure Data Factory, Key Vault, Databricks, Azure Synapse, and Power BI**.
- Processed data through a complete Medallion architecture and automated the entire workflow to trigger scheduled updates, delivering real-time dashboard analytics without manual work.

Module Developer | KADA System Website Development Project Dec 2024 - Feb 2025

- Digitalized manual paper tracking by building a reporting module with **Laravel Query Builder** and **MySQL** to retrieve financial data and export on-demand PDFs via **DomPDF**.
- Built backend mail services using **Laravel Notifications** and **Brevo SMTP** to instantly trigger and send automated application status updates to users.

TECHNICAL SKILLS

Languages & Databases: SQL, C++, Java, Python, Microsoft SQL Server (SSMS), MySQL, MongoDB (NoSQL), Adminer
Framework & Tools: Laravel, Flutter, UiPath, Alteryx, GitHub, Git, VS Code, Power BI

ACTIVITIES & LEADERSHIP

Performer & General Affairs | UTM 24 Festive Drums Club Jun 2024 - Apr 2026

- Managed event logistics, inventory maintenance, and performed on stage for major campus events and the club's annual 2-hour public production.
